1. Enum 1
 2. Enum 2

Example: definition

Definition

Fibration A fibration is a mapping between two topological spaces that has the homotopy lifting property for every space X .

Example: lemma and theorem

Lemma

Given two line segments whose lengths are a and b respectively there is a real number r such that $b = ra$.

Proof.

To prove it by contradiction try and assume that the statement is false, proceed from there and at some point you will arrive to a contradiction. □
